TELEPATHIC TRANSLATION OF THE GEOMETRY OF NAZCA

ALPHA AND OMEGA

TELEPATHIC TRANSLATION OF THE GEOMETRY
OF NAZCA; DICTATED BY THE DIVINE FATHER
JEHOVAH; THIS GEOMETRY CORRESPONDS
TO THE SAME AUTHORS OF THE DRAWINGS
OF THE STONES OF NAZCA; THIS GEOMETRY
SYMBOLIZES THE GEOMETRIC ORIGIN OF
THE EARTH; IT REPRESENTS THE SUNS
ALPHA AND OMEGA, OF THE GALAXY TRINO;
THEIR AUTHORS ARE THE ONES WHO CAME
FROM THE YELLOW PLANET; AN ALREADY
EXTINGUISHED PLANET; ITS AUTHORS MADE
SUCH GEOMETRIES, WITH THE PURPOSE
OF MAKING THEIR PASSAGE ON THE EARTH
KNOWN; FOR BEING THEM PROPHETIC,
THEY KNEW THAT THEIR PASSAGE ON THE
EARTH WOULD COVER JUST ONE PERIOD;
THESE CREATURES' MATHEMATICS ARE OF

A SOLAR ORIGIN; THEY DOMINATED THE LIVING NUMBERS; THEY HAD THE NUMERICAL VISION; THEY TALKED TO MATTER, IN ONE THIRD OF A KNOWN TOTALITY; THIS VERY REMOTE CIVILIZATION IS NOT FROM ADAM AND EVE'S TRUNK; THEY HAD THEIR ORIGIN ON THE YELLOW PLANET; FOR WHAT IS UP ABOVE IS THE SAME AS DOWN BELOW; IN ALL THE PLANETS OF THE THINKING EXPANSIVE UNIVERSE THERE ARE AND THERE WERE ORIGINAL TRUNKS; MANY OF THESE GALACTIC CREATURES SHALL BE SEEN BY THE WORLD; FOR THEY SHALL BE RESURRECTED FROM DUST BY THE FIRST-BORN SOLAR SON CHRIST; FOR IN VIRTUE OF THE SPIRITS' FREE WILL IS THAT SOME REQUESTED THE FINAL JUDGMENT ON THE PLANET EARTH, AND OTHERS OUT OF THE EARTH; THE LAWS OF THE CREATOR ARE THE SAME UP ABOVE AS WELL AS DOWN BELOW.-

The geometry and the mathematics of all the civilizations that there were on this planet, were created in the suns Alpha and Omega, of the macrocosm called Kingdom of Heavens; they were created in the same place, where the human life was created; the everything above everything came out of a same place of the cosmos; and being it a same place, it was at the same time everywhere of the cosmos; for every law that came out of the Father, never stops; it is eternally expansive; the present material worlds shall end, and the divine mandates of Father Jehovah shall continue expanding in the form of new worlds; this expansive law of the universe was known by the creators of geometries and mathematics of the civilizations of the past; it is because of this cause that the geometrical element used by them, was the point, the line and circle; in the mathematics of Nazca, its creators got

inspired in laws, which they knew had to do with them, and with the beings that would be born in the future; they knew a lot about the present men; they also knew that the present generation would fall into a strange psychological influence, as a result of their complex of possession towards gold; they knew that in this strange influence, the present man would rule himself not by the cosmic laws, but by the strange laws of gold; the result of it is that man does not see the cosmos which he was born from as something of his own; this strange blindness of his own reality costs man not to enter the Kingdom of Heavens again; because of his strange attitudes the own man disinherits himself; these creatures authors of many geometrical drawings, carved in stones or rocks, wanted to warn the present generation of the danger they were into, by letting themselves be influenced by

the strange sensation which the possession of gold causes in every spirit; they knew the cause of the future judgment, which the present human gender had to confront; for besides their prophetic powers, they received galactic communications; for they lived the Era of the Open Heavens; a fascinating era in which the strange desire for possession was not awake in any of those who lived it; they lived what presently man struggles for living; the own system of gold drowns him and limits him; for three quarters of his mental effort is spent in gaining his own living; the originators of such backwardness in others shall pay second by second, the time of all the centuries that the strange reign of gold lasted; the creatures of Nazca and of other civilizations knew all this; as they knew about other judgments that the Earth had, when the sun did not shine over her; it was the era

of the relative darkness; for such darkness started from the blackest to the less black; going through infinite shades of darkness; these creatures knew what the divine Word of the Creator of everything consisted of; they knew that everything that came out of the Creator, constituted one sole geometric line; and that this line covered the everything above everything; it covered the spiritual and the material; and they knew that this line had been succeeding itself from world to world and from sun to sun; the divine verb that took the form of human life was born from this concept; in other universes which are within the same universe, the divine verb took other infinite geometries; for if up above is the same as down below, the divine verb has a divine free will; just as men have a human free will; and since the free will is in the everything above everything, is that every

free will is also composed of the solar line Alpha; the solar line Alpha is the place where the Earth was born; it is the place where she was born like a microscopic sparklet; the little sparklet that came out of the suns Alpha and Omega still has fire in its center; the exterior part of the sparklet has been cooling off and it has turned into a terrestrial cortex; what happened to the sparklet is the same that happens to the seed of the plants; the space made the sparklet germinate; the atmospheric magnetism in covenant with all the elements of the universe made the little sparklet sprout; it is said that what is up above is the same as down below, for this law of making sprout or germinate is for the microscopic as well as for the colossal; it is for a plant as well as for the own planet as a whole; the creatures who were the authors of the geometry of Nazca, knew the law that

what is up above is the same as down below; they drew lines and drawings so that they would be interpreted from above, in the Era of the Open Heavens; they saw the signs and symbols made by them from their celestial spaceships; they carved their wisdom in messages turned into geometries in stones or rocks; for the stone or rock lasts a greater time to the inclemency and erosions which are caused in the development of time; and the deepest among them even knew who would be interested in the study of their engravings; every engraved rock or stone existing in this world shall be translated by the living telepathy between Father and Son; as they are translated, all the false building of the false history, emerged from the strange life system, which came out of the strange laws of gold, shall be collapsing; the present history is false, for men fell into falseness;

the greatest falseness of men consists in having them promised Father Jehovah to fulfill His divine morality, in a form of life, and they did not fulfill it; for the strange inequality came out of men; an inequality that no one in this world requested the Father; for nothing unequal is requested to the Father; inequality became materialized in the strange life system, which came out of the laws of gold; this constitutes the greatest tragedy for this humanity; for from such strange life system, the human creature of all his generations, got to know what they should have never known; they got to know scandal, vice, immorality; he got to know what he did not request; and he who did in the remote worlds or planets what he did not request in the Kingdom of Heavens, does not enter the Kingdom again; the trials of life consisted in fulfilling on the remote planet what was written in

the Kingdom of Heavens; and which each one requested and promised to fulfill above all imaginable things; this was also known by the creators of the engravings of Ica and Nazca.-

This figure shows a creature who is prostrated; its symbol indicates Alpha and

Omega; a place of origin of the planet Earth; the position of the arms has the geometry of a right angle of 90° ; it represents the original geometry with which the solar sparklet was born, which is the present Earth; every original spark of every planet is born with an own geometry; there are as many planetary geometries as there are planets in the Thinking Expansive Universe; of those which were and shall be; the arms of the creature have 3 parallel lines; this shows the lineal trinity, for every known and unknown element has got a trinity; for no one is disinherited not even in what is the most microscopic; the trinity was the Alpha and Omega of the galaxy Trino for them; Trino means Three in One; the Father, the Son and the knowledge called Holy Spirit; by creating each one their own knowledge, they create their own Holy Spirit; they create their own trinity in their knowledge; the

fact that the figure carries its own trinity in itself, means that each one makes his own heaven; this figure composed of head, arms and legs shows that the mental ideas have in their microscopic beginning, the same origin that governed for the primitive sparklet, which the Earth is from; it indicates that what is up above is repeated down below; it means that anytime one thinks, the generated idea is born in an Alpha lineal form, it goes instantaneously through the physical body, and it abandons it in a circular way or Omega circle; these creatures knew what the First-born Solar Son Christ knew; he said: I am the Alpha and the Omega; what the Son of God meant was that there was a cosmic place called Alpha and Omega, from which the Earth was born; the Alpha lines of the figure are united to the body of it; this means unity of the everything above everything; it

means that not a single molecule is independent from the rest of the universe; and it means that everything returns to its place of origin; the fact that both arms have the lines Alpha means that there are trinities creators of worlds, which are the same and different at the same time; for one arm is left and the other is right; there are four Alpha lines in the arms; which means figure in Revelation, containing the interpretation of the trinity in it; for if the everything above everything contains trinity, the geometric four and the numeral four also have it; the interpretation of our lines in the arms means they knew the Binary Trinity; to them, the number four represented a trinity of greater hierarchy among the trinities that they knew; the lines Alpha of the figure also shows that the dimension called destiny is born from each one; and that every destiny of our trinity makes use of

space, time and knowledge or living philosophy; four represents the square turned into a number; which means that the trinity is in all the geometrical, numeral and philosophical trinities, creating the everything above everything.-

The Head of the figure: Represents the divine Solar Mother Omega; it represents the universal fertilization; Alpha impregnated Omega; for if what is up above is the same as down below, up above one also creates as one creates down below; up above, solar creations; down below human creations; the inheritance is transmitted through the entire universe; the Omega circle represents an endless return; it represents an eternal transformation; which shall never end; it represents a forever and ever of a present; without considering that in other infinite

presents something alike takes place; eternity was infinite presents for these creatures, which one shall never be able to tell; the Omega circle represents what is feminine of the entire creation; Alpha represents what is masculine; this figure has a galactic psychology; their creators tried to imitate the airplane of the present human beings; they understood many centuries before what man tries to understand now; their comprehension was a prophetic comprehension; they explored the future; the fundamental difference between them and the present human beings was that they knew in a universal way their own place of origin; they knew that their Yellow planet was older than the own Earth; and they knew that both planets were created by the Solar Father Alpha and the Solar Mother Omega; and they knew that every sun of any sex constituted the divine solar

trinity, in the divine Father Jehovah; the Head of the figure also represents the way how the Thinking Expansive Universe gets expanded; and it represents the waves of every order of nature; among them are the geometric waves of the First-born Solar Son Christ's fire; from his eyes shall magnetic lines come out, which shall burn every corrupted one; this fire of the Son of God, is constituted by the living numbers or mathematics; the same living mathematics and numbers with which the creation of every human life was calculated; and of every creature of creation; the Omega circle represents in prophesy, the Worldwide Government of Women; for having equality come out of the Father, it triumphs over all the strange concepts that man had, in the trials of life; certainly any equality shall never come out of licentiousness; that is why the strange life system, which came

out of the strange laws of gold, never could nor shall never be able to give humanity the long awaited equality; for that to happen, the own strange life system, which came out of the strange complex towards gold, has to disappear; this strange complex which makes a licentious being out of every creature, was seen by the creatures of old civilizations; and the psychology learnt from it, was a psychology that one was dangerously playing with the own spiritual destiny; they called darkness the strange licentiousness; for licentiousness is neither written nor taught in any of the Scriptures which came out of Father Jehovah; the most microscopic strange practice, on the remote planets, is sufficient for not entering the Kingdom of Heavens again.-

The lower part of the figure represents the roots of a tree; the Alpha lines represent

its ramifications; this means that every galactic inheritance emerged from the dust of the planets; for matter and spirit got initiated by starting from the most microscopic; every tree started from the seed; in the infinite universe, where no one knows the planet Earth, the planetary families are called Galactic Trees; an eternal synonym of eternal inheritance; the term Trunk comes from there; the Galactic Trunk represents the beginning of a determined gender of creatures on the planets; the trunk is the head of a form of life; Adam and Eve are the trunk of the human gender; and they are not of those who come from other galaxies; he who did not believe in Adam and Eve, he negated a planetary beginning; every beginning is living before the Father; and every beginning expresses itself in its laws of beginning, before the Creator; just as a spirit expresses himself

before the Father; and every beginning accuses every spirit who negated it on the remote planets before the Father; he who negated his first terrestrial parents, negated the Father; for it was taught that God was everywhere; He is also in every past; He is also in all the first parents of every planet; for what is up above is the same as down below; in the lower central part of the drawing you can see a small Root, in the form of a Trident; it means that every root was small; and that every inheritance leaves an influence, when the hereditary tree has grown; this inheritance are the characteristics of the races; and the geometric forms of the remote galaxies, in the infinite cosmos; so it is that the present engravers of stones of Ica and of other parts of the world, live the influence of a past; for every spirit is born again; which means that it has been born many times; one

is born again in order to know new lives again; he who is not born again does not know new forms of life; one requests new forms of life to the Father, for every spirit wants to get to the Father; and one only gets to the Father by the eternal improvement; this eternal getting to the Father, is infinite; and in each getting to the Father, one knows one of the infinite forms of the Father; the creatures creators of the drawings of Nazca and Ica knew this; and they knew it in a science that adjusted itself to the own psychology of the divine Gospel of Father Jehovah; and they knew that the law of reincarnation figured in the future Gospel of the future humanity; what they knew is written in the divine Gospel of the Father; He says: Every spirit is born again; which means that every spirit reincarnates again; for being eternity every spirit's normal life, the planetary lives

are the being born again, for every spirit; each being born again gives place to new planetary beginnings; one law that came out of the Father can be expressed and understood in infinite ways; and it does not stop from being the same law; he who denied the reincarnation or his own being born again, negated the entire universe; for thank to the covenants with the elements of the universe is that every spirit has got the fascinating opportunity of knowing lives that he does not know; he who denied the reincarnation, negated the participation of the elements in himself; just as the spirit negated in the trials of life, likewise the elements of the cosmos shall negate him their own participation, when the own spirit requests in the future to know another form of life; only the divine intervention of the Father saves the spirit; this strange negation of oneself is born from

a strange psychology, which came out of a strange and unknown life system; it is born from a strange delusion, which emerged from the possession of gold; this strange delusion entertains the spirit for a while, and it draws him away from eternity; for to each second of strange illusion, every spirit who let himself be influenced by it has to live an existence out of the Kingdom of Heavens; behold the creatures of the civilizations of the planetary past, knew about this human tragedy; they knew the cause of the divine Final Judgment; they knew that the own life system, inspired in gold, was the own satan; behold everything that happens to humanity, was known by them; and other civilizations of other hierarchies knew about them; the Nazca's drawing has got infinite interpretations; for it came out of an imagination that had an abysmal science; the more profound

and elevated a science is, the greater are its teachings; even if it expresses itself in the most simple way, that one can possibly imagine; among the civilizations of the past, the Atlanteans' and the Underwater World's, there were great prophets; they announced their respective civilizations, their own falls; their own final judgments; the term: Final Judgment has been happening since the beginning of the world; now it is the turn for the strange life system, which came out of the strange laws of gold; for every divided reign ends up in a final judgment; the strange life system, which came out of the strange laws of gold, divided the world in nations; it lived imitating satan; for satan divided the Father's angels, in the Kingdom of Heavens; and it is written in the Kingdom of Heavens that neither satan nor his imitators, in the remote worlds, no one enters the Father's

Kingdom; this humanity was warned of this abysmal truth; it is written in the divine Gospel of the Father: Satan divides and he divides himself; the divine parables and the divine warnings of Father Jehovah are fulfilled in everything imaginable; they are fulfilled in the everything above everything; in what is visible and what is invisible; in what is touched and what is seen; and in what is felt and is not seen; for having the divine Father Jehovah created everything that exists, is that He judges everything imaginable; and within the imaginable are all the forms of faith, which men and women gave themselves, in the trials of life; for every form of faith forms part of the human work; and it is written that everyone in this world shall be judged according to their acts; Faith is the interpretation that each one gave the divine psychology of the divine Gospel of Father

Jehovah; the old people of the civilizations of the past were not within these laws of judgment; for they did not divide themselves in nations; they were reigns which formed part of a whole; if they disappeared from the human scene, it was due to other causes; for there is everything in the Father's vineyard; the requests of life and circumstances made to the Father, were different to those of the human gender; the circumstance of the verb was another; not even the elements were the same to the present ones; for at the beginning of the world, everything was gigantic; including time; one day, one night, one year of the old ones was equivalent to four of the present ones; that is why there were giants who lived hundreds of years; this shows that in the reincarnations of spirits participate a conglomerate of spirits, who request to go to the remote planets in the same epoch; and

that the characteristics of these reincarnations had a lot in common; the most microscopic characteristic of a reincarnation has an infinite meaning in the Kingdom of Heavens; for from what is microscopic, being this spiritual or material, future universes, galaxies, planets, suns, cosmos are born; for what is colossal is born from what is little and humble; the creatures of the old civilizations knew about the expansive law of every microbe; they knew that every planet had been a microbe; they knew that everything colossal had been microscopic first; they knew that every planet emerges from the visible to the invisible; this knowledge was also taught to the present human generation; the divine Gospel of Father Jehovah says: One has to be humble in order to be great in the Kingdom of Heavens; And whoever humbler than an idea? The idea generated by everyone

is so microscopic that it is only felt but it does not let itself be seen; the divine final judgment judges every thinking creature, idea by idea; starting from the age of twelve years old; the children, the innocence, have no judgment; if this world had created a life system in which everyone had kept the joy of a child, during the entire life, be sure that this world would not have a final judgment; for the morality of joy is the morality of the Kingdom of Heavens; if it did not happen that way in the trials of life, it was because the strange life system, which came out of gold, included inequality; inequality is not known in the Kingdom of Heavens; the true joy which should have come out of a fair life system, did not come out; and a strange joy was brewing in the hearts and minds of those who had the misfortune of finding themselves in this world, with a strange form of

living, conceived by a group of ambitious beings; this constitutes the human tragedy of all times; the creators and sustainers of such strange life system, know nothing nor do they want to know about the divine morality of the Father; for they did not take into account the divine Gospel of the Father at all, when they decided to create a life system; the human psychology revolved around the greater capacity of gold, which this or that person had; the human psychology was distorted by a strange psychology; for no one requested wealth to the Father; not even the so-called rich requested it; for one does not request the Father anything unfair; from the moment in which no rich enters the Kingdom of Heavens, the so-called wealth is not known in the Kingdom; and everything unknown in the Kingdom is called strange to the Kingdom; the most microscopic

immorality is strange in the Kingdom of Heavens; the beings of the old world knew it; for they requested to live the fascinating era of the Open Heavens; the same era which is coming to this generation; this era which shall shudder the world is initiated by the First-born Solar Son Christ; the older son of the Father is already on Earth; his face is maturing; which means that a solar brightness is being born from each of his pores; for every sprout starts from the most microscopic towards the big one; it starts from the invisible to the visible; many have talked to the First-born Son, and they have not noticed it; they shall realize it when the brightness of his face becomes visible to the human eye; it is written that the Son of God would come to the world shining like a sun of wisdom; the old people of Ica and Nazca called the Son of God, the Child of the Radiant Face;

who came from the remote suns of colors of the Macrocosm, called the Kingdom of Heavens; and they knew that his new appearance would be in the final times of the strange world created and inspired in strange laws of gold; and they knew that his appearance would cause terror in the beast and in the prostitute of the strange world of gold; and they knew that his arrival would surprise the world; just like a burglar surprises everyone.-

ALPHA AND OMEGA.-

Scroll N° 3.306

**The author, Emissary Alpha and Omega,
shows the telepathic scrolls.**

Welcome to the translation project. We present the translations of the telepathic message, in its Alpha stage or initial. This message was written in Spanish. The Planetary Community, must qualify these translations. For in this way proposals with the best translations.
