The spirits of North America

ALPHA AND OMEGA

**PROPHECY DICTATED BY LIVING TELEPATHY, BY THE DIVINE
FATHER JEHOVAH; EXTRACTED FROM THE ROLLS OF THE LAMB
OF GOD; THIS DIVINE PROPHECY WAS ALREADY DICTATED
FORTY YEARS AGO.-**

The spirits of North America who requested the trials of life to God, requested Him to be judged by the elements, within the own laws of life; for they did not know in what consisted the sensation of being judged by the elements of a planet in trial, which they did not know; for when one requests God forms of life which are not known, such request is done starting from the greatest innocence that the mind can imagine; it is so that all the sensations that each one has within his/her individuality, the spirit did not know them; this is why the divine gospel of God says: every spirit is trialed in his/her own sensations, by God; and it is also mentioned: The trials of life.-

The spirits of North America did not undergo great damages in World War II, by means of men, for the damage that came out of men were not requested by them to God; they requested the damage of the elements; if they got to violate the divine law of God; and they violated it; for by improving themselves, they did it on the basis of unequal laws; what is unequal does not please God; for what is unequal never achieves the real happiness; what is unequal

perpetuates injustice and unhappiness; what is unequal produces a strange ephemeral happiness, and it lies on the injustice that millions of beings undergo; trying to conquer happiness for everyone, without renouncing inequality, is simply a chimera; the irrefutable fact of hundreds of centuries consumed in unequal laws prove it; the creators of happiness on the basis of unequal laws could make use of millions of years ahead, and they will never ever achieve the perfect happiness for everyone; horrible moments await the creators of a strange life system; for the divine judgment of the elements shall be fulfilled on them; first it shall be cold, then water, and finally fire; in the judgment of water, the oceans shall overflow; inundating three quarters of North America; the sun's fire shall char its lands and there shall not remain any vestige of water to drink; for everything shall evaporate; the elements shall destroy in a few minutes what took years and centuries of work; the economic power of North America shall be reduced in 70%; this is why it was written in the divine gospel of God; Seventy thousand; this divine parable of God meant a strange well-being achieved in a numerical unbalance; for 7 does not have its medial term in equality; the halves of 7 are not equal; one has more and the other less; the 1000 represented the advent of a fair doctrine; for it is a number of potency; a new potency is born from the psychology of inequality; and it means that all the nations that were forced to live in inequality, shall awake and form a new nation; these nations succeed in detaching themselves from what is unbalanced

and they create what is balanced; they emancipate themselves from the old system of unequal laws; when the spirits of North America requested God to be judged by the elements, they made a request proper of crazy people; for the elements are infinite and they have no limits; conversely, men's punishment against men is limited; the damages caused by a war among men are mended soon; it is within the human limits; the experience left by World War II demonstrated it; the fall of North America as a world power, shall be by poverty; and this poverty shall be so immense that its inhabitants shall even beg for food; and it is fulfilled on them what in the divine gospel of God was written: you shall be judged by your deeds; the North American deed left millions of poor people of all the categories as a balance; which in part were forced to be so; for the north American beast, took the strange liberty of making use of the force in order to impose its laws, and the trials of life consisted in not getting tempted in the use of force; for being God all love, everyone with no exception, had requested Him laws of love; as the divine final judgment, requested to God by the humanity, included all the imaginable things, is that all those who got tempted in using the force, during the trials of life shall fall by the force; the force of the elements destroys them; if they had sowed love, they would have received love.-
